MYCaW® / MYMOP® Training

we have three training offers for each tool- each are one hour, £195+VAT and delivered over video call by our expert team:

- *1. Introduction to MYCaW® / MYMOP® - what is the tool , the ethos behind it, guidance on how to use it, and Q&A specific to your project/service. This course can give people administrating MYCaW® or MYMOP® confidence in how to apply it and improve the fidelity of data collection across a team.*

- *2. Strategic approach to analysing and reporting MYCaW® / MYMOP® data - this course goes through the different types of analysis you can do with the scores and the qualitative data. We also take you through how to cross reference the different types of data, how to use the data for audit, evaluation, service development, identification of staff training needs and demonstrating impact to funders.*

- *3. Training on coding MYCaW® / MYMOP® data. This session is specifically to train people on how to use content analysis to develop a bespoke framework of concerns for their project, based on good research practice. If you are interested we can cover basic statistical analysis of scores in excel e.g. how to calculate the mean, standard deviation and do paired t-test to see if the score changes are statistically significant.*
